

Hornet Care Team

Hornet Care Team is here for you! Our main goal is to make mental health services more accessible to students. There are several services available through our Community Mental Health Center (COMCARE): therapy, case management and access to the liaison. Some services are provided at school and others can be in the community. The other goal of the Hornet Care team is to increase communication between mental health services and the school so that our students can have as much support as they need. In order for services to begin, a release of information needs to be signed by a legal guardian so that communication can begin with COMCARE. If your student qualifies we will get them started in the program and determine the best services for each student. This program is designed to...

- Increase school attendance
- Decrease dropout rates
- Improve behavior
- Increase graduation rates
- Improve grades
- Increase stability in the home
